GABRIELLE EMANUEL

6-Minute Listen + PLAYLIST <> ☰

Five decades ago, the National Cancer Act became law. What did it take for cancer to go from an unmentionable disease to among the most visible and best-funded in medicine?

USA TODAY

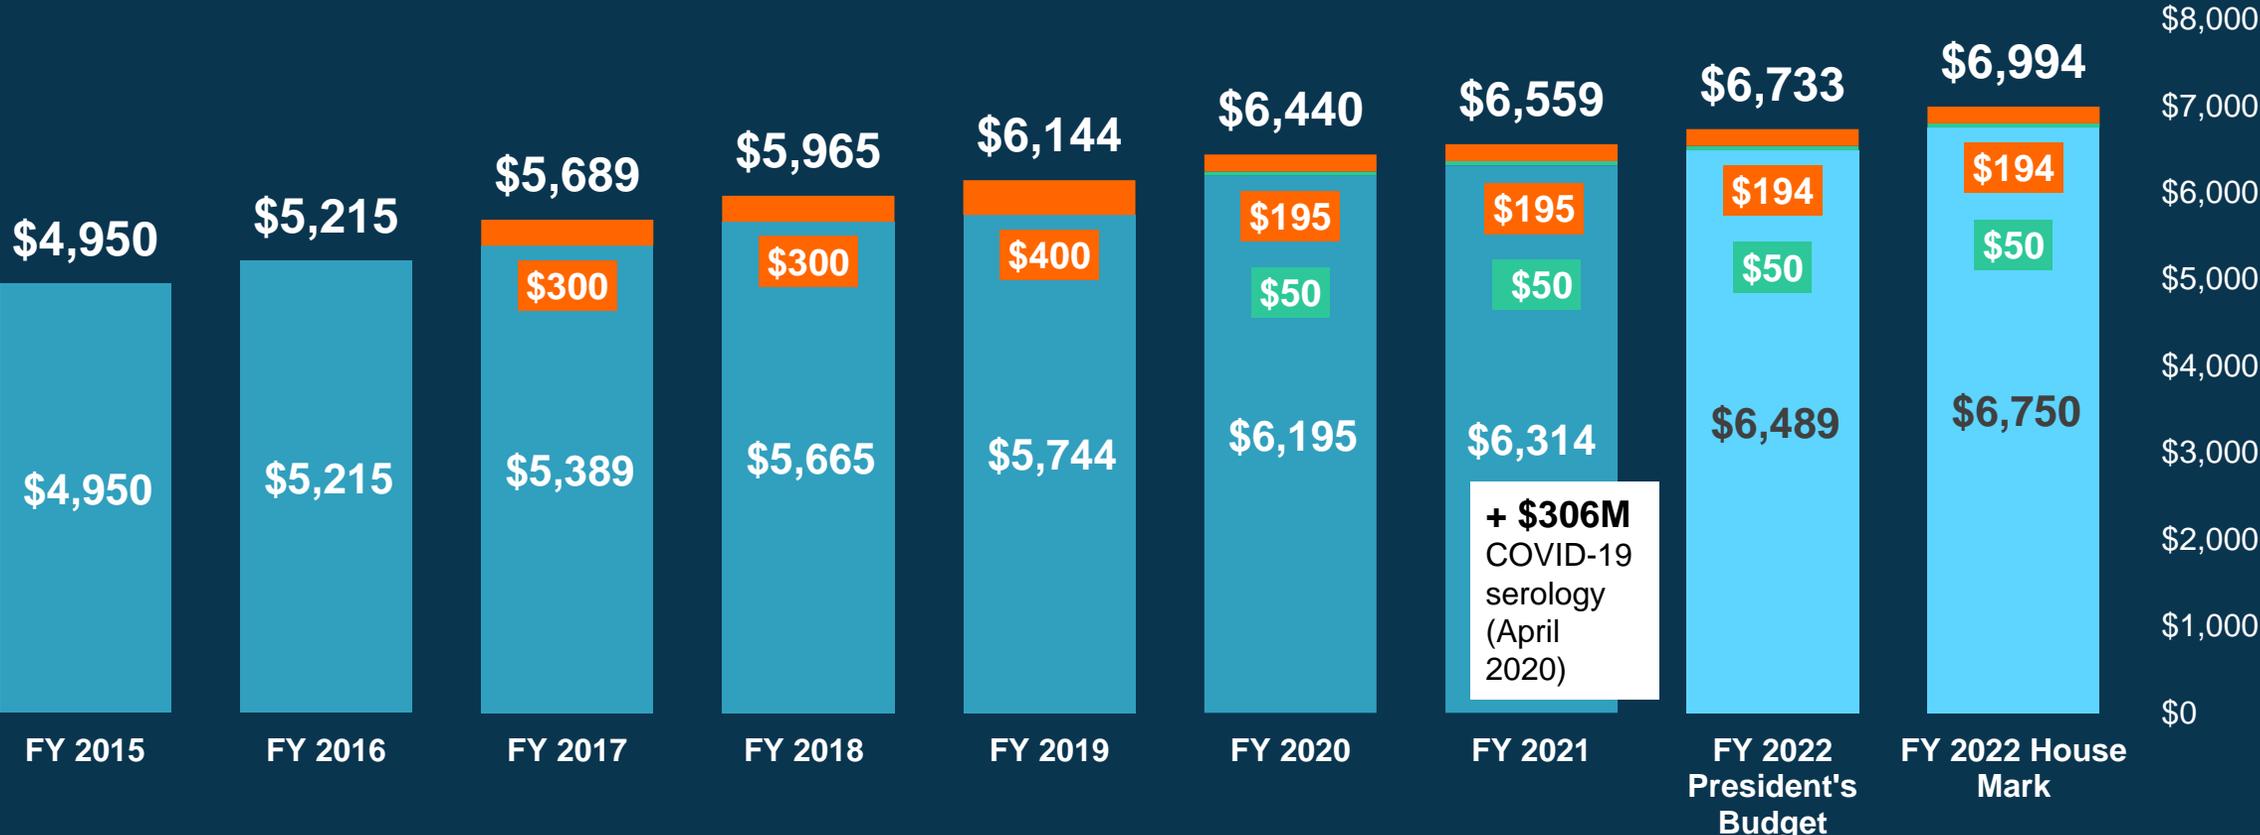

Published 5:30 a.m. ET Dec. 23, 2021 | Updated 10:28 a.m. ET Dec. 23, 2021

50 years after the US declared war against cancer, the fight continues. These are the 10 biggest victories.

NCI Appropriations

FY 2015 – 2022 (in millions)

21st Century Cures Act - orange
 Childhood Cancer Initiative - green

+ \$306M
 COVID-19
 serology
 (April
 2020)

FY 22 Continuing Resolution expires March 11.

NCI Interim Paylines for FY 2022

GRANT TYPE	INTERIM PAYLINE
R01 Grants for Established and New Investigators	9th Percentile
R01 Grants for Early-Stage Investigators (ESIs)	14th Percentile
R21 Exploratory Grants	9th Percentile
Non-competing grants will be funded at 90% during this period of uncertainty.

Familiar Fiscal Challenges for NCI

December 6, 2021, by NCI Director Dr. Norman E. Sharpless

On the heels of Congress extending the Continuing Resolution for FY 2022, the NCI Director addresses what short-term funding means for NCI's grantee community. As in years past, Dr. Sharpless highlights the Institute's interim payline policies for both competing and noncompeting grants.

Opinion

A \$1-Billion Boost to the NCI Will Help Us Beat Cancer

The organization's underfunding means critical research is not being done

Scientific American – December 28, 2021

“ We must work together to treat cancer with the same urgency that we tackled the pandemic—starting with a **robust, sustained investment in cancer research through the National Cancer Institute (NCI).** ”

Senator Chris Coons
Delaware (D)

Senator Jerry Moran
Kansas (R)

Ending cancer as we know it

BY CARYN LERMAN, PH.D., AND ROBERT A. WINN, MD, OPINION CONTRIBUTORS — 02/17/22 08:00 AM EST
THE VIEWS EXPRESSED BY CONTRIBUTORS ARE THEIR OWN AND NOT THE VIEW OF THE HILL

The Hill – February 17, 2022

“ Cancer is projected to cost the U.S. \$245 billion by 2030... **Now is the time for Congress to invest in cancer research to support the president's plan to end cancer as we know it.** We all stand to benefit. ”

“I’m proud to announce our plan to supercharge the Cancer Moonshot as a central effort of the Biden-Harris administration... This is a presidential priority. I will do my part on funding and using my authority as president to speed breakthroughs. I challenge and encourage all of you to do your part.”

— President Joe Biden (February 2, 2022)

Commitment to a Safe and Respectful Workplace at NIH

“An environment where people feel **welcome, respected, and valued** is critical to enable all individuals to contribute to their fullest potential.

Our continued growth toward this goal is grounded in the **expectation that all employees respect one another in their workplace interactions.**”

*Lawrence A. Tabak, D.D.S., Ph.D.
Acting Director, NIH
February 10, 2022*

Cancer MoonshotSM

The Cancer Moonshot has three ambitious goals: to **accelerate scientific discovery in cancer**, **foster greater collaboration**, and **improve the sharing of data**.

Ending Cancer As We Know It

DIAGNOSE CANCER SOONER

Increase access to screening, support patients through diagnosis, evaluate new technologies like multi-cancer detection tests

PREVENT CANCER

Explore mRNA technology, address environmental exposures to cancer

ADDRESS INEQUITIES

Ensure every community in the nation has access to diagnostics, therapeutics, and clinical trials

TARGET TREATMENTS TO THE RIGHT PATIENTS

Learn more about genetics, immune responses, and other factors, to tell which combination of treatments will work best in an individual patient

SPEED PROGRESS AGAINST DEADLIEST & RAREST CANCERS

Invest in a robust pipeline for new treatments

SUPPORT PATIENTS, CAREGIVERS, & SURVIVORS

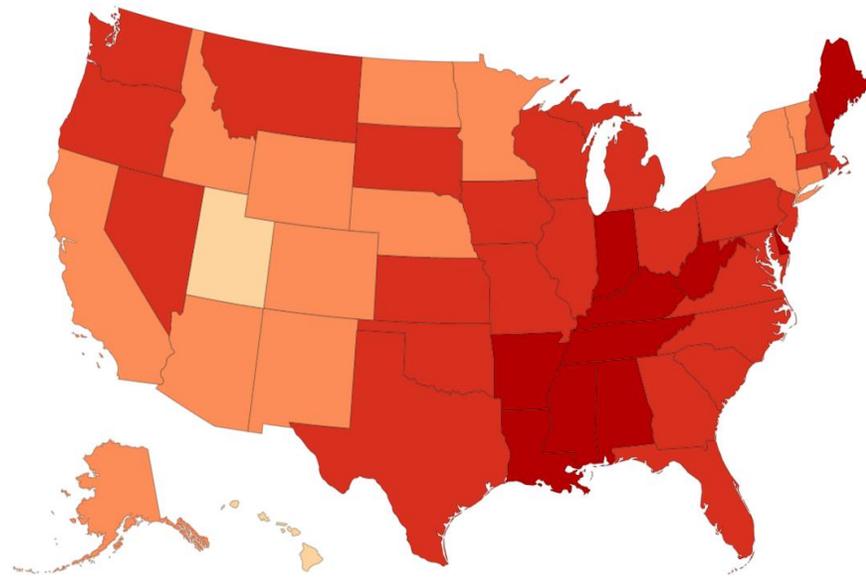

Help people overcome medical, financial, and emotional burdens; provide support to navigate diagnosis, treatment, and survivorship

LEARN FROM ALL PATIENTS

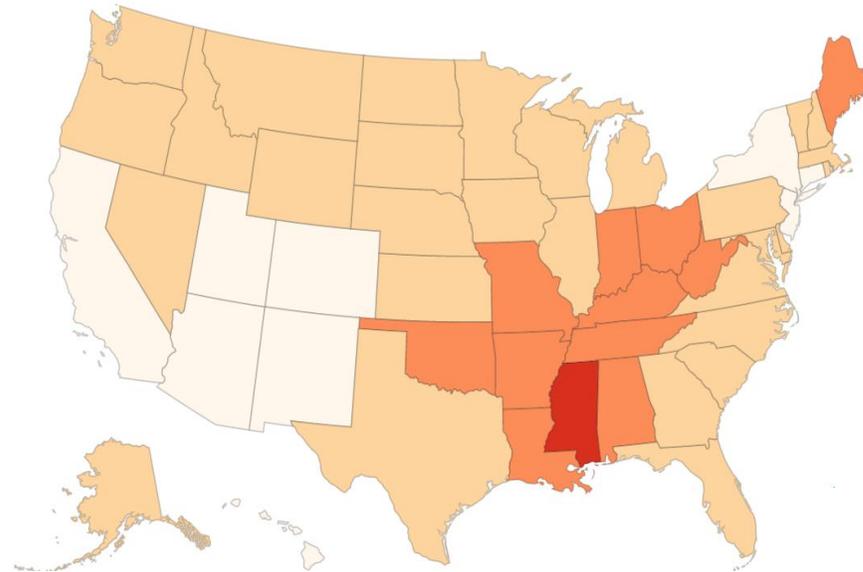

Leverage diverse experiences of patients and families to develop approaches to end cancer as we know it

Age-Adjusted Cancer Mortality

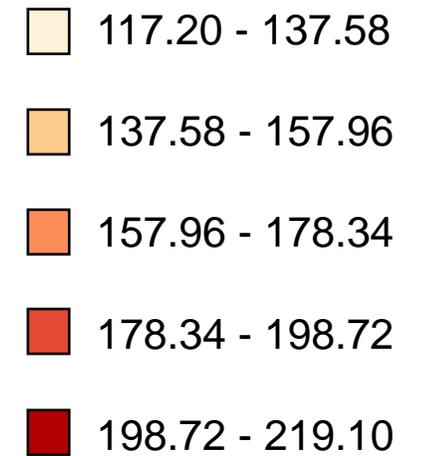

2005

2019

Age Adjusted Rates
(per 100,000)

New White House Cancer Mortality Goal

1990 **215** deaths per 100,000

2019 **146** deaths per 100,000

In 25 years...

73 deaths per 100,000

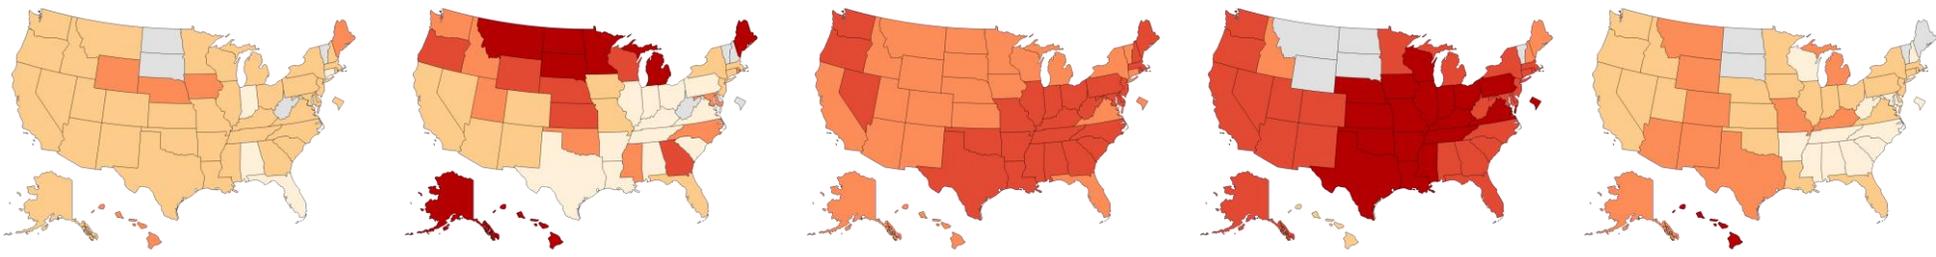

“The goal is to cut the cancer death rate in half in the next 25 years.”

— President Biden
Feb. 2, 2022

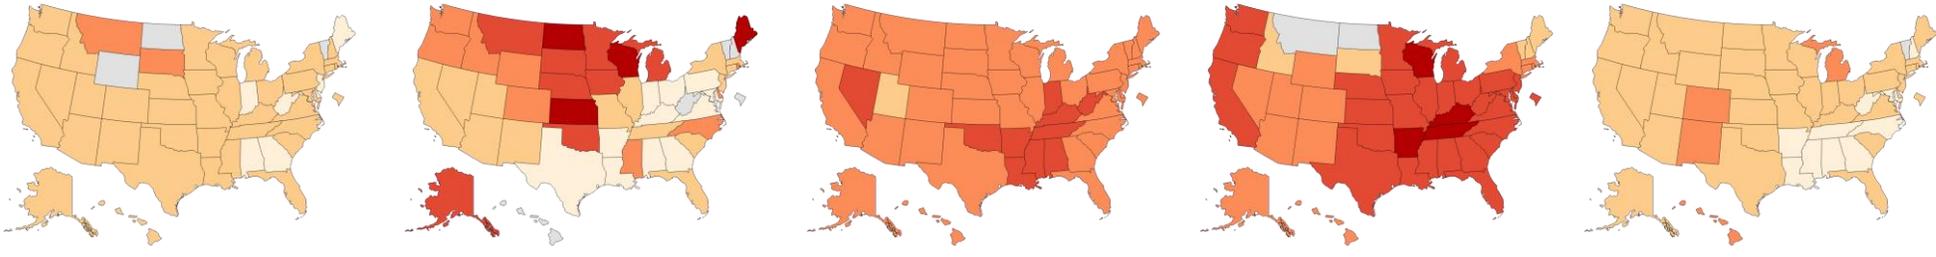

Mortality From All Malignant Cancers (By Race / Ethnicity)

Non-Hispanic Asian / Pacific Islander (API) Non-Hispanic American Indian and Alaskan Native (AIAN) Non-Hispanic White Non-Hispanic Black Hispanic

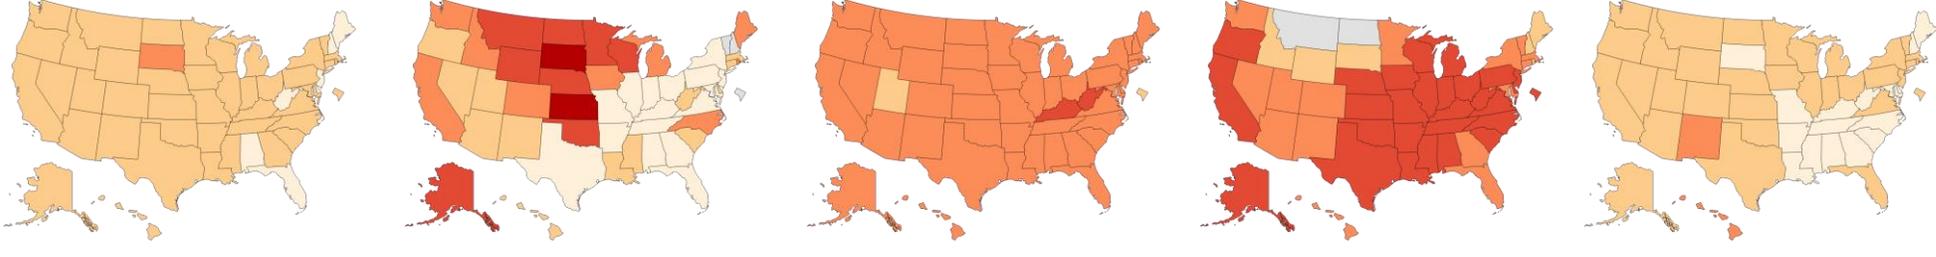

2000 to 2004

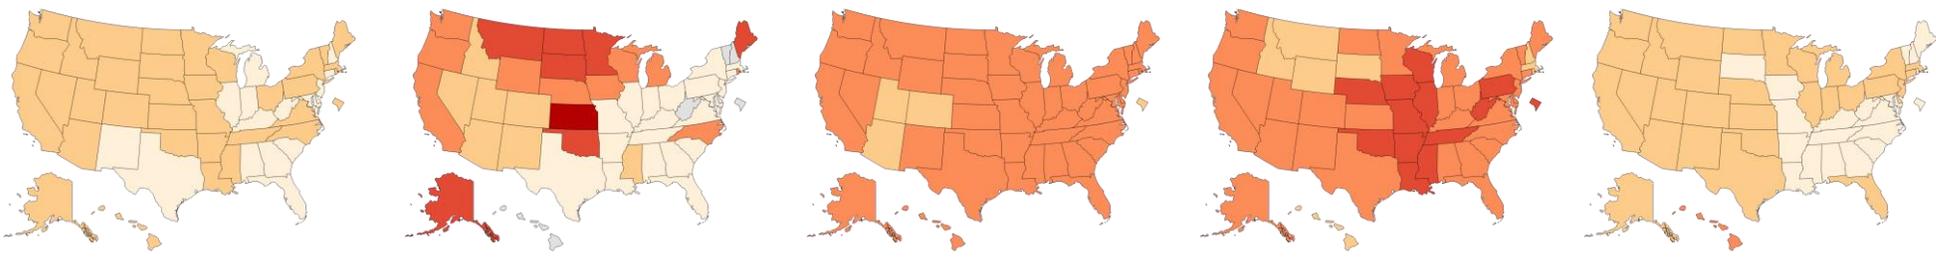

2005 to 2009

2010 to 2014

2015 to 2019

Age Adjusted Rates (per 100,000)

- 33.1 – 86.7
- 86.8 – 139.6
- 139.7 – 192.5
- 192.6 – 245.4
- 245.4 – 398.6
- < 16 deaths

Closing Gaps in Cancer Screening:

Connecting People, Communities, and Systems to Improve Equity and Access

Improve and align communication

Facilitate equitable access

Strengthen workforce collaborations

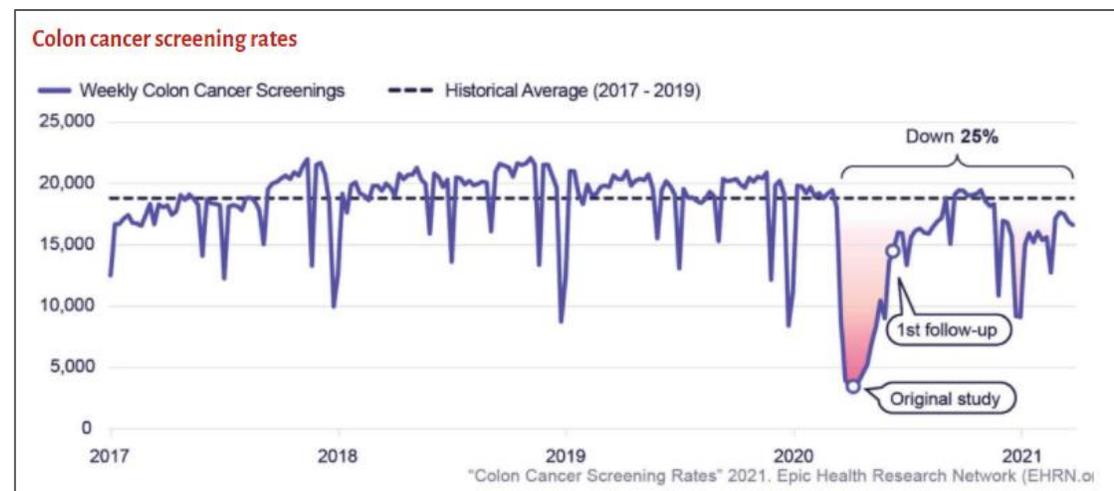

Create effective health IT

"...more **effective and equitable implementation of cancer screening** represents a significant opportunity for the National Cancer Program, with potential to accelerate the decline in cancer deaths and, in some cases, prevent cancer.."

Call to Action on Cancer Screening

“Americans have missed more than 9 million cancer screenings in the last two years because of COVID. Nine million. We have to get cancer screenings back on track and make sure that they are accessible to all Americans.”

President Joe Biden
February 2, 2022

Blood-based multi-cancer detection tests (MCDs)

OUTSTANDING QUESTIONS

Can MCD tests detect many subclinical cancers at early stage **and reduce mortality?**

How safe is an MCD-negative test result?

What are the rates of false-positive/negative results, and of finding indolent cancers (overdiagnosis)?

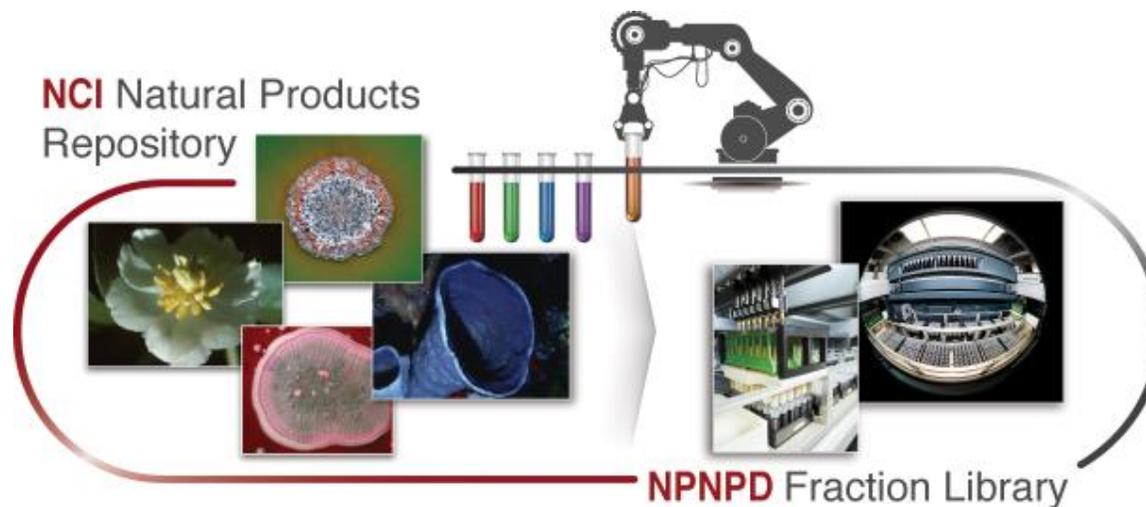

Request for Information (RFI)

Seeking Input from Multi-Cancer Early Detection Test Developers on Readiness for Participation in an NCI-Sponsored Clinical Utility Randomized Controlled Screening Trial

The NCI Program for Natural Product Discovery

- **Joint effort of Division of Cancer Treatment and Diagnosis + Center for Cancer Research**
- **Facilitate both intramural and extramural research and address current challenges in natural product-based drug discovery**
- **Funded by the Cancer Moonshot**

Team connects genetic variant to poor outcomes after certain cancer treatment – *Lancet Oncology* (December 9, 2021)

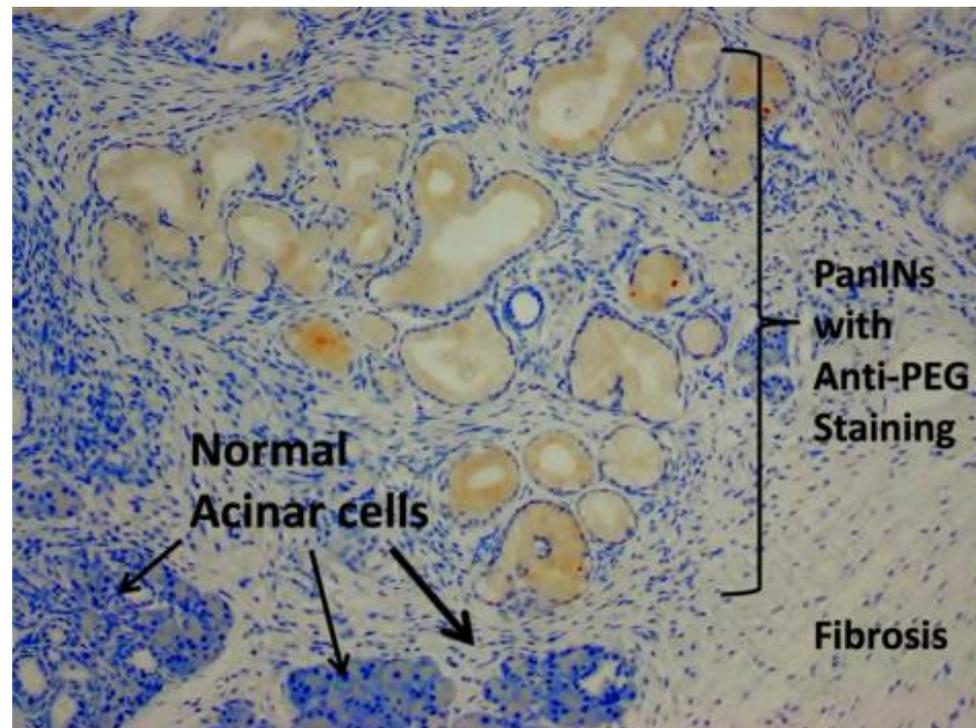

- Presence of **HLA-A*03** associated with **ineffective immune checkpoint inhibition therapy and lower survival rates** overall, across tumor types, despite treatment.
- HLA-A*03 potentially useful screening marker to determine whether a patient should receive immune checkpoint inhibitors.

Figure: Effect of HLA-A*03 on overall survival in MSK-IMPACT across all tumor types, stratified for tumor type

Naranbhai V, Viard M, Dean M, Groha S, Braun DA, Labaki C, Shukla SA, Yuki Y, Shah P, Chin K, Wind-Rotolo M, Mu XJ, Robbins PB, Gusev A, Choueiri TK, Gulley JL, Carrington M. HLA-A*03 and response to immune checkpoint blockade in cancer: an epidemiological biomarker study. *Lancet Oncology*. December 9, 2021

Nanotechnology enables potential novel imaging agent for early pancreatic cancer detection – *Biomolecules* (November 25, 2021)

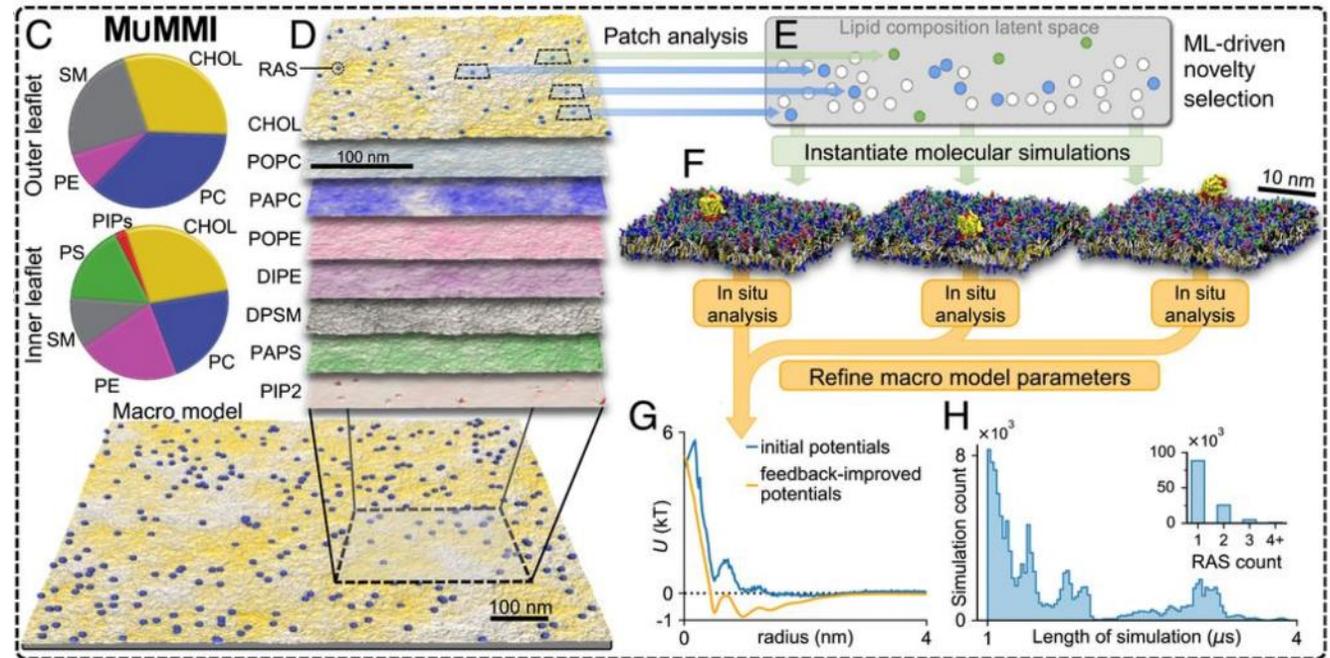

- FNL scientists (Stephan Stern, Jill Smith, and others) **created novel imaging agent that might detect deadly pancreatic cancer at its earliest stages**
- Discovered membrane receptor CCK-BR that is overexpressed in cancer cells + precancerous lesions
- Developed a fluorescent nanoparticle that attaches to the CCK-BR on PanINs -> cellular accumulation of the fluorescent signal -> revealed precancerous PanINs

Machine learning-backed model reveals new insights about RAS biology not possible with traditional experiments

Proceedings of the National Academy of Sciences (January 4, 2022)

- Multiscale model that simulated KRAS on a complex model membrane: Multiscale Machine-Learned Modeling Infrastructure (MuMMI)
- First time such scale of analysis and machine learning used for this kind of computational biology
- Joint Design of Advanced Computing Solutions for Cancer (JDACS4C) collaboration between DOE, NCI, FNL and other organizations

NCI New Personnel Announcement

Dr. Brigitte Widemann

**Special Advisor to the Director
for Childhood Cancer**

“We are living in a golden age of research and discovery.

We can end this terror, and all of us have a role to play.”

First Lady Dr. Jill Biden
February 2, 2022
